## 1.0 Домен апликације

Апликација покрива домен друштвене мреже. На овој друштвеној мрежи је поред пријаве и регистрације омогућено праћење и испраћивање других корисника, претрага пратилаца, објављивање садржаја у текстуалном облику, његова измена и брисање, лајковање, одлајковање, коментарисање, измена и брисање коментара и измена личних података.

## 2.0 Опис функционалности

Функционалности су следеће: пријављивање на сајт, измена корисничких података (имена, презимена, e-mail адресе, лозинке и профилне фотографије), објављивање садржаја, његова измена и брисање, објављивање коментара, њихова измена, брисање и лајковање, измена боје тастера услед преласка миша преко њега, промена боје линка услед преласка миша, промена боје код активног линка у навигацији, претрага пратилаца на профилној страници, слање e-mail-а администратору, динамичко исписивање линкова у навигацији, коментара, објава и категорија којима припадају објаве, користи се модал приликом приказа одређене порука која указује на исход радње која је претходно обављена и преусмеравање корисника у зависности од исхода обављене радње. Такође је омогућена и валидација података како на клијенту тако и на серверу и чишћење формулара након успешног уноса или измене података.

## 3.0 Кориштеће технологије

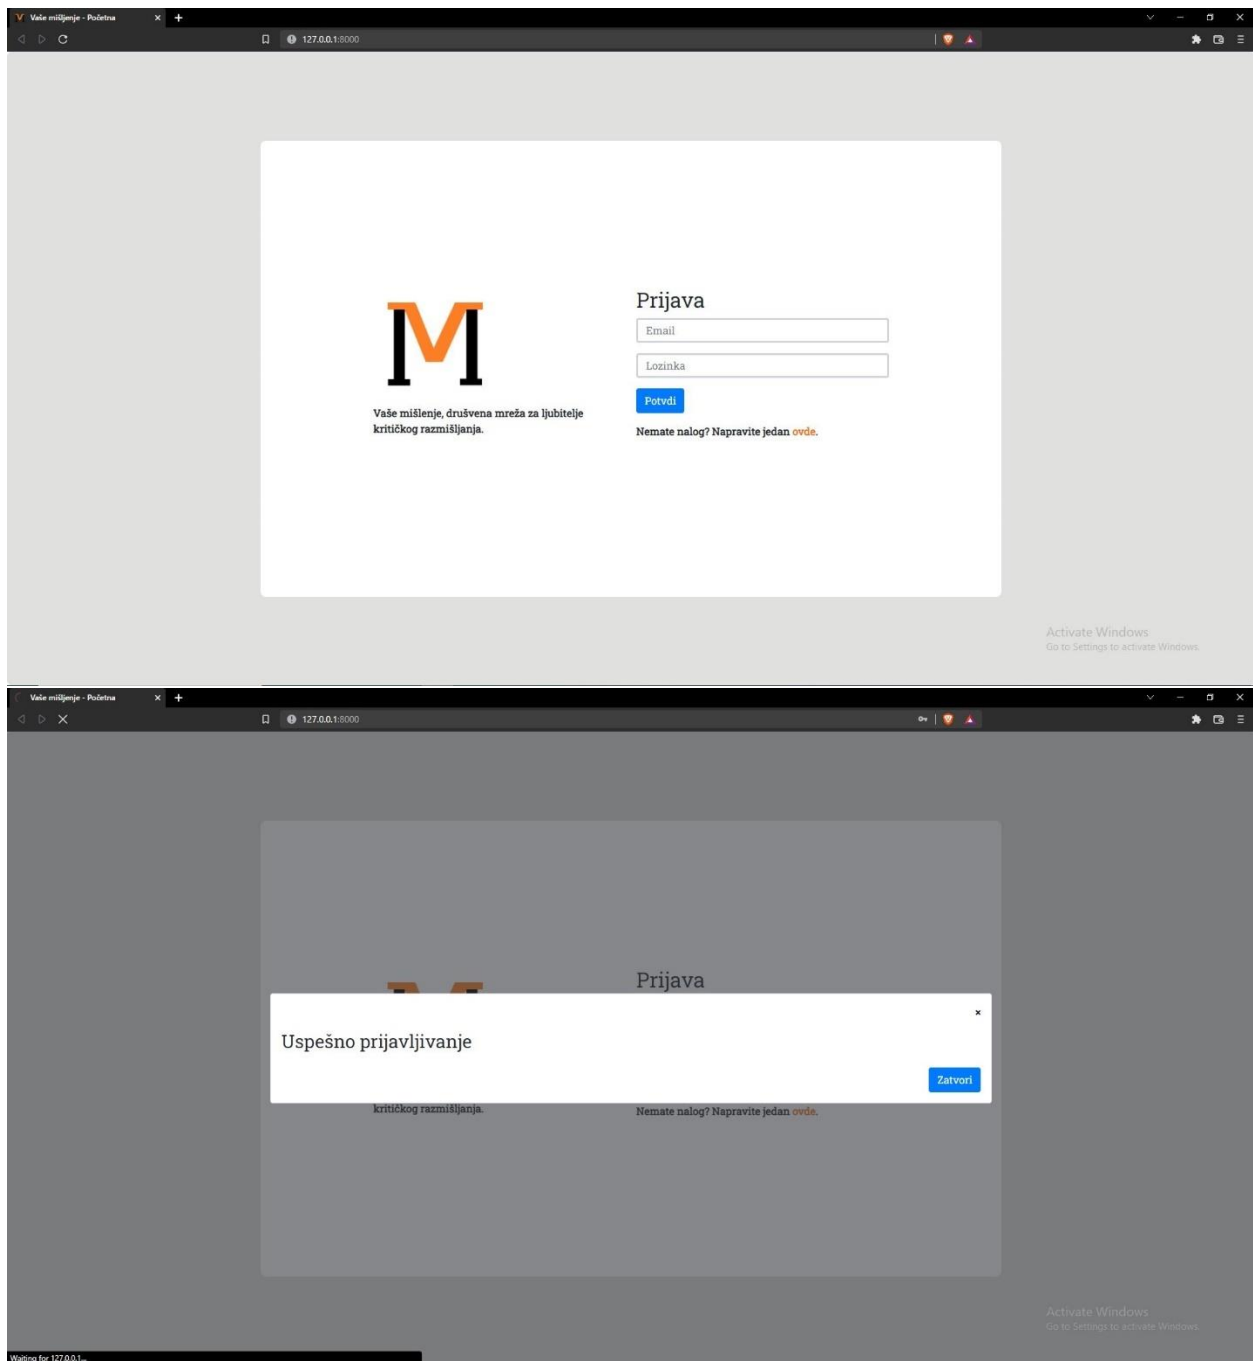

- Laravel framework (8.0)
- jQuery
- Bootstrap
- Blade engine
- HTML 5
- CSS 3
- PHP Storm
- Sass
- Javascript

## 4.0 Странице и опис функционалности

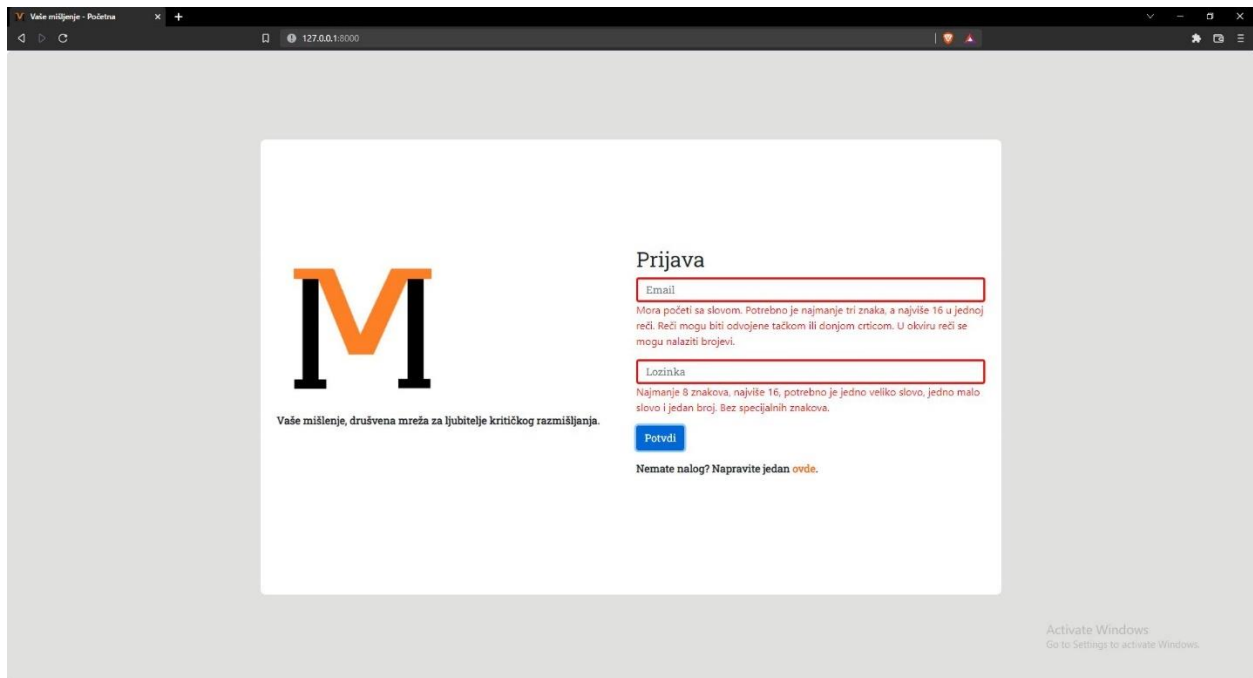

### 4.1 Почетка страна

На почетној страни се налази формулар за пријаву. У случају да корисник нема налог може приступити формулару за регистрацију преко линка који се налази испод формулара за пријаву. Након уноса података приказује се модел који извештава корисника и самом иходу и уколико је исход успешан онда се преусмерава на профилну страницу.

Уколико подаци нису приликом уноса прихватљиви онда је приказ следећи:

## 4.2 Регистрација

Ова страница омогућава корисницима да направе своје налоге, услед уноса неприхватљивих података приказаше се порука која указује како се унета вредност мора разобличити. Након потврђивања формулара, приказује се модал са одређеном поруком. На послетку је могућ повраћај на почетну страну преко линка испод формулара.

Приметићете да се услед неправилног уноса података приказују и модал и поруке у исти мах, овде сам доставио две слике како би се што боље виделе поруке исписане испод уносних поља.

## 4.3 Аутор

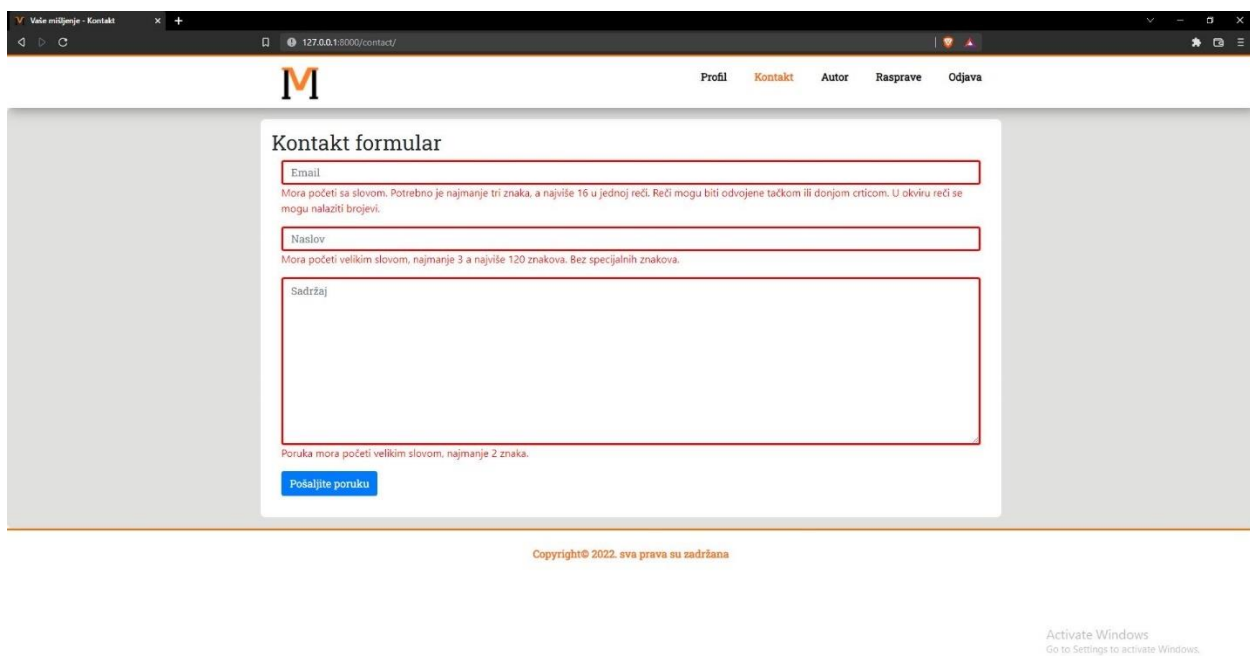

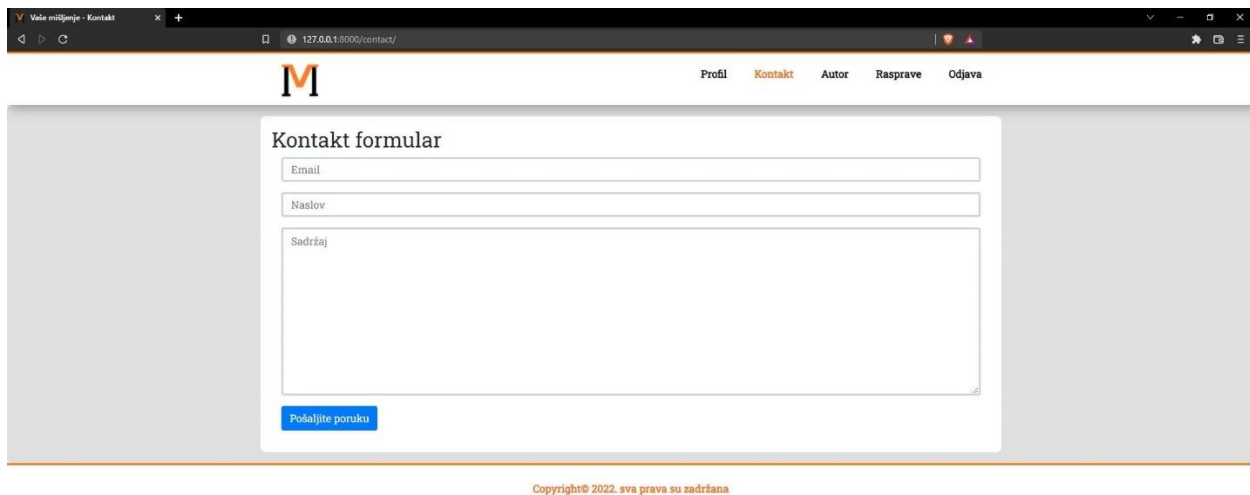

На овој страници је представљена кратка биографија аутора сајта, која је дохваћена из базе података, као и његова фотографија. Документација је доступна на овој страници.

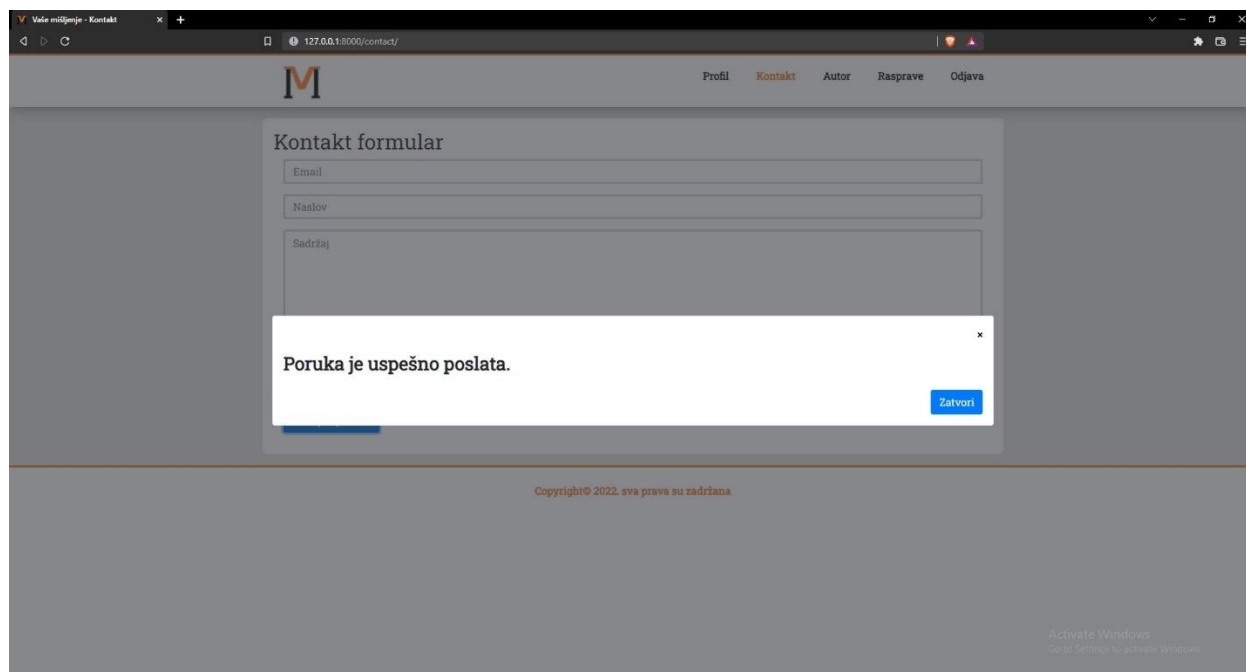

Activate Windows  
Go to Settings to activate Windows.

#### 4.4 Контакт

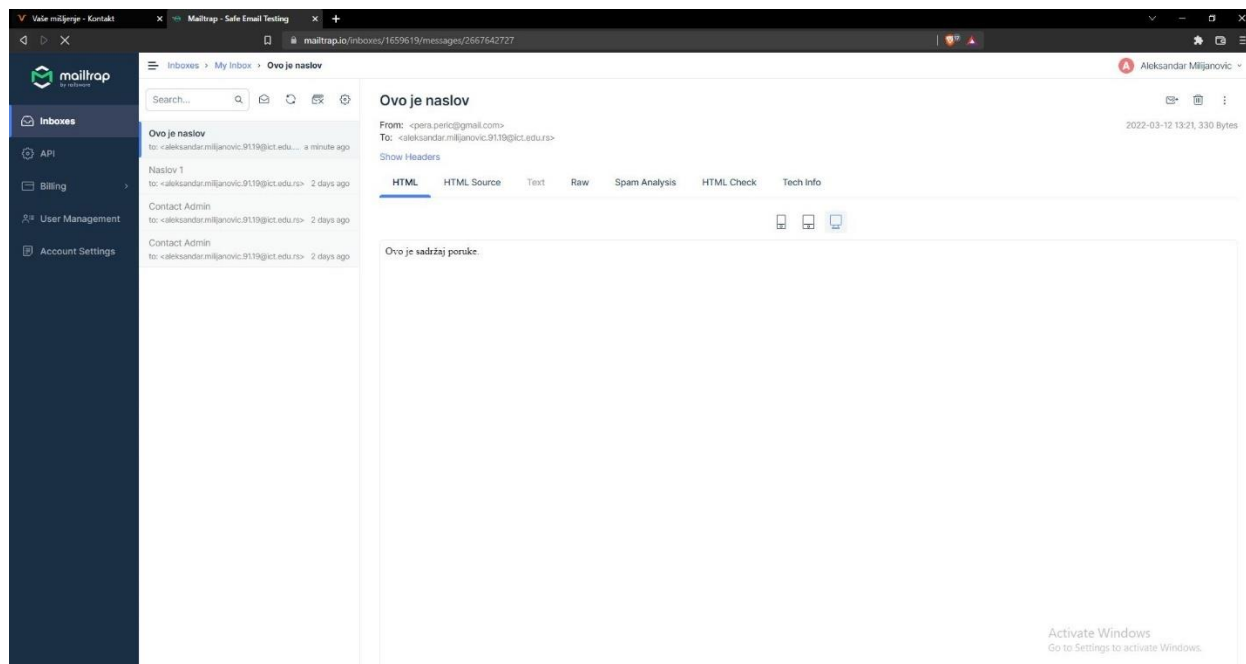

Страница омогућава слање e-mail-а преко датог формулара који се шаље администратору. Уколико подаци нису прихватљиви корисник се извештава о томе, као и о исходу слања.

Ovom prilikom je korišten MailTrap (<https://mailtrap.io/>) preko koga sam saгледао послате поруке.

## 4.5 Профил

Преко ове странице корисник може увидети своју целокупну активност на апликацији у смислу на објаве које је објавио, њихове коментаре, лајкове као и друге кориснике које је запратио.

По успешном пријављивању, корисник се преусмерава директно на ову страницу. Могуће је направити нову објаву, изменити је или обрисати. Исто важи и за коментаре. Могуће је лајковање и одлајковање, одлазак на профил запраћеног корисника или отпратити га и додати коментар.

Zašto je Crnjanski najveći srpski pisac (2022-03-11 15:33:18)

Književnost

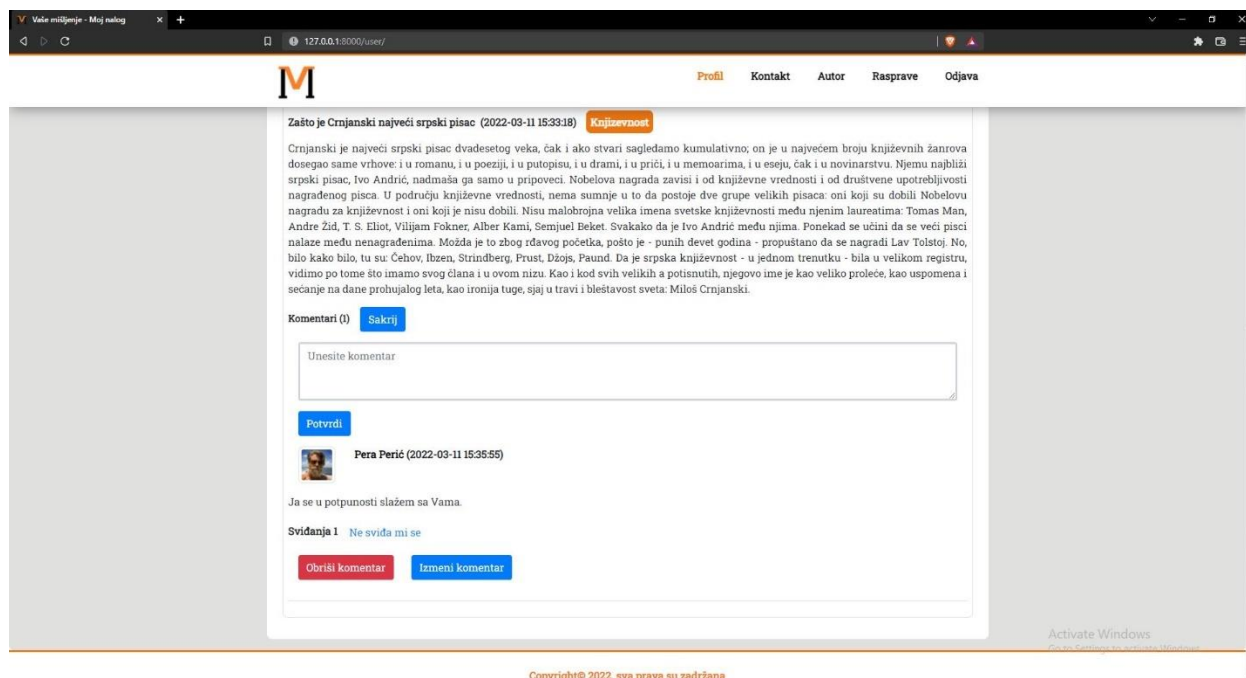

Crnjanski je najveći srpski pisac dvadesetog veka, čak i ako stvari sagledamo kumulativno; on je u najvećem broju književnih žanrova dosegao same vrhove: i u romanu, i u poeziji, i u putopisu, i u drami, i u priči, i u memoarima, i u eseju, čak i u novinarstvu. Njemu najbliži srpski pisac, Ivo Andrić, nadmašta ga samo u pripovesti. Nobelova nagrada zavisi i od književne vrednosti i od društvene upotrebljivosti nagrađenog pisca. U području književne vrednosti, nema sumnje u to da postoje dve grupe velikih pisaca: oni koji su dobili Nobelovu

## 4.6 Измена корисникових података

На овој страници је могућа промена података (имена, презимена, лозинке, е-mail-а и профилне фотографије). Можете приметити да постоје два тастера за потврду. То сам урадио зато што се сви подаци изузев фотографије шаљу путем Ајах-а. Услед уноса недозвољених вредности се приказују поруке испод уносних поља и приказује модал са одређеном поруком. Потребно је истаћи да се приликом учитавања странице формулар попуњава са корисниковим подацима и повраћај на профил се чини кликом на линк у подножју формулара.

Ponekad se učini da se veći pisci nalaze među nenagrađenima. Možda je to zbog rđavog početka, pošto je - punih devet godina - propušteno da se nagradi Lav Tolstoj, No, bilo kako bilo, tu su: Čehov, Ibsen, Strindberg, Prust, Džojz, Paund. Da je srpska književnost - u jednom trenutku - bila u velikom registru, vidimo po tome što imamo svog člana i u ovom nizu. Kao i kod svih velikih a potisnutih, njegovo ime je kao veliko proleće, kao uspomena i sećanje na dane probujalog leta, kao ironija tuge, sjaj u travi i bleštavost sveta: Miloš Crnjanski.

## 4.9 Измена коментара

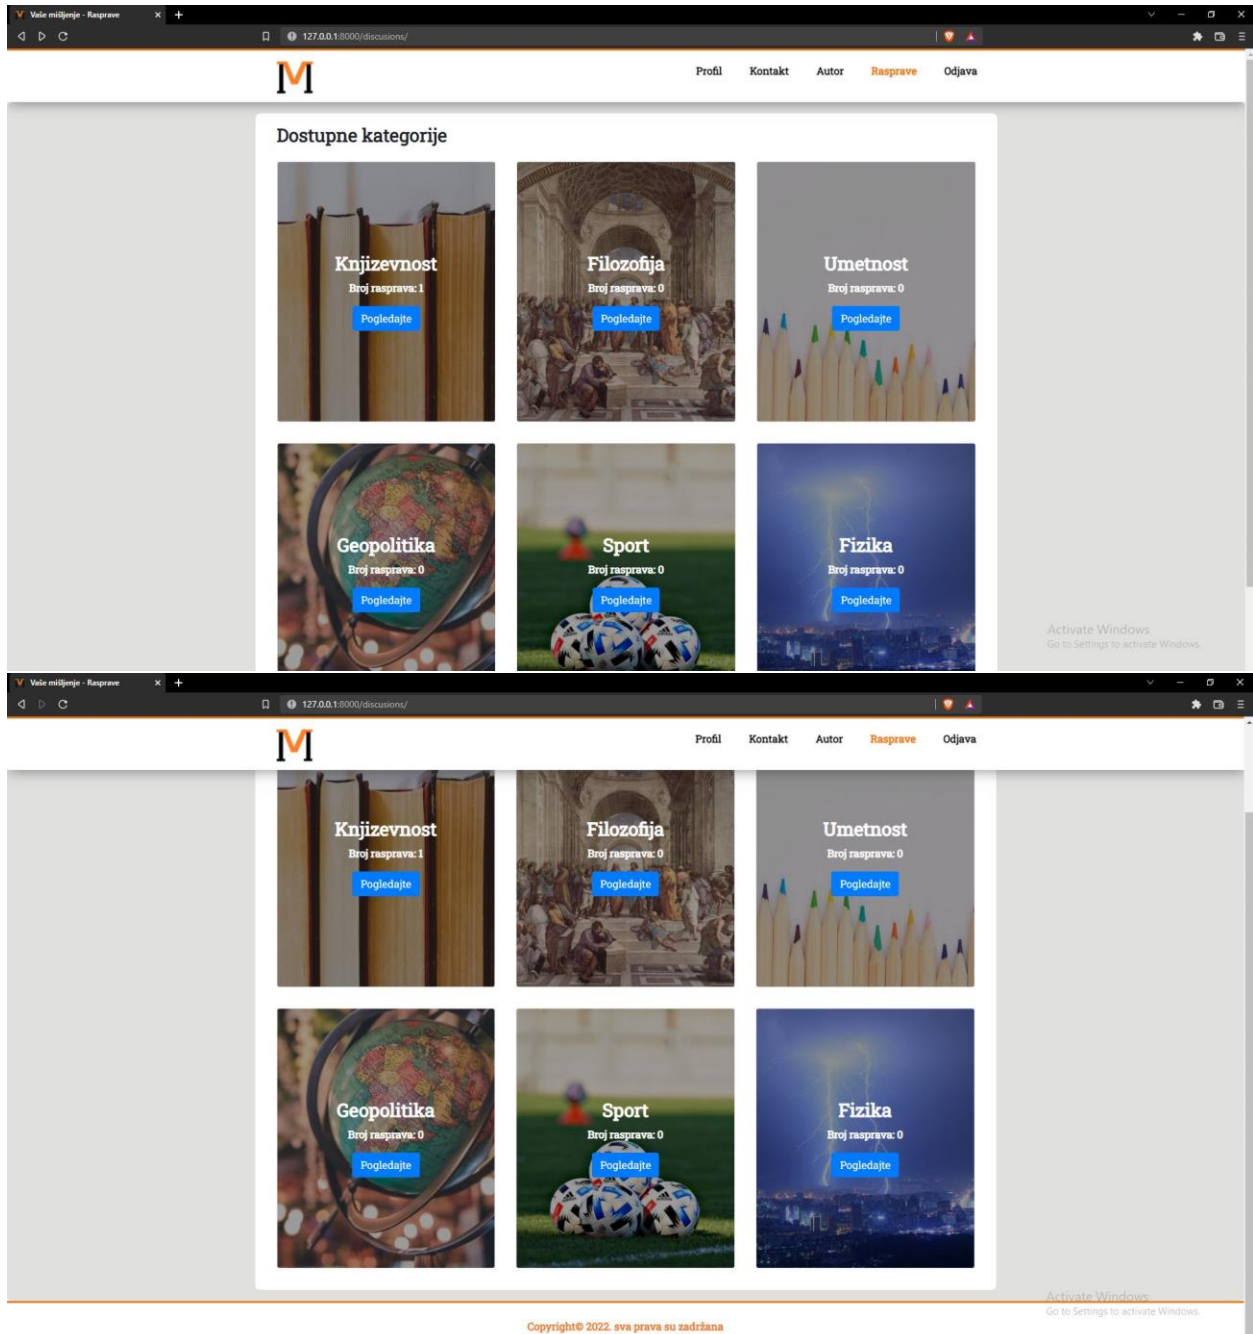

Ова страница омогућава измену коментара преко доступног формулара. Могуће је и враћање на профил преко тастера који је поред тастера за потврду. Приликом уноса неприхватљивих вредности поруке се приказују као и модал са одређеном поруком.

## 4.10 Расправе

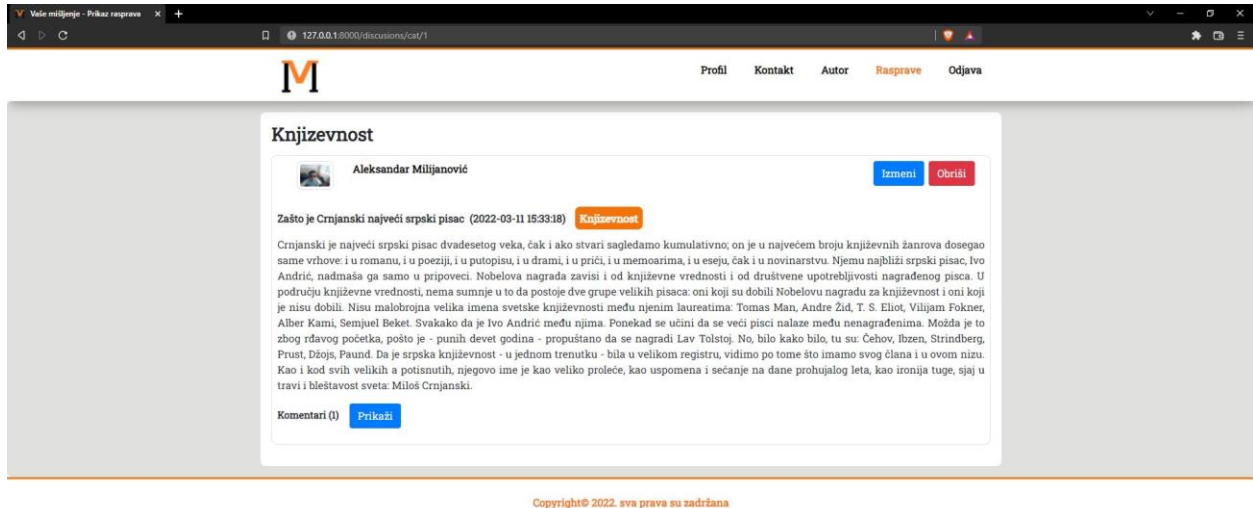

На овој страници корисник се може упознати са могућим категоријама, односно врстама расправа које се на друштвеној мрежи одвијају. Приказан је број расправа који припадају свакој категорији понаособ. Кликом на тастер, корисник бива преусмерен на страницу где су доступне само објаве које припадају датој категорији.

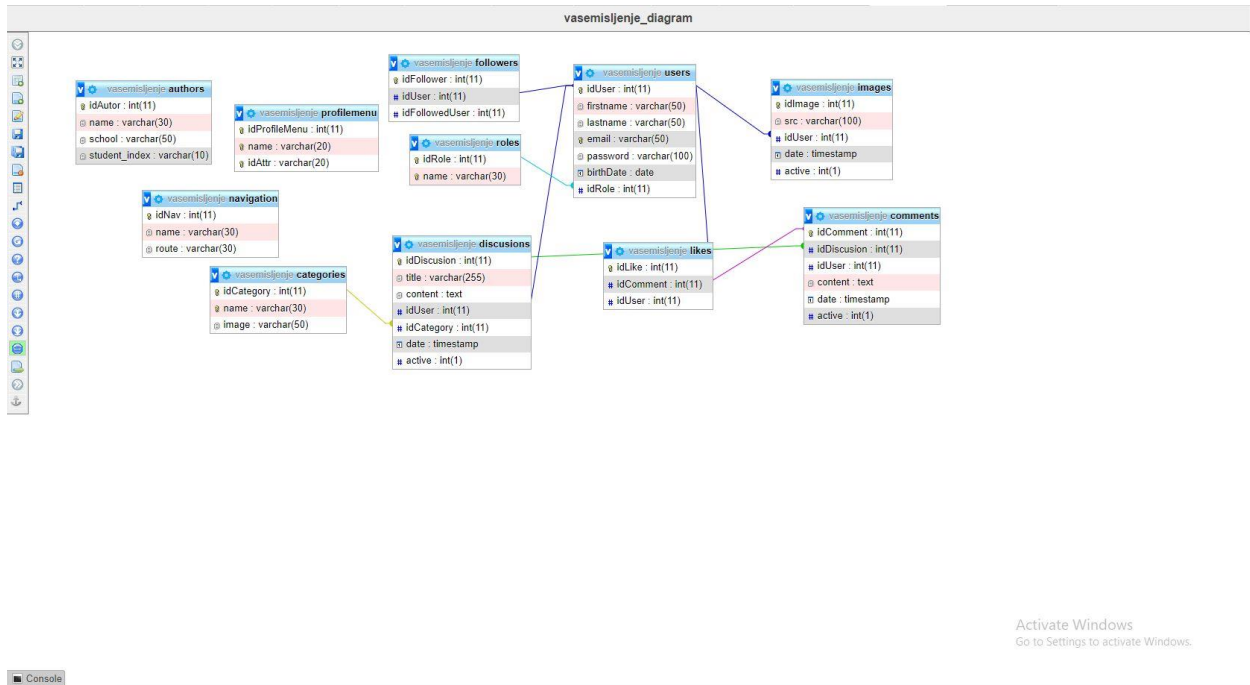

## 4.11 Расправе одређене категорије

На овој страници је могуће коментарисати и лајковати објаве других, као и приступити станицама за измену и обрисати како објаве тако и коментаре. Могуће је отићи на профиле других корисника који су у одабраној секцији нешто објавили.
